

Create a Common Diagnosis Preference List.....

1. Add a hospital diagnosis common to your patient population to the Hospital Problem List.
2. Right click over the name of the problem listed in the Hospital Problem List.
3. Left click the selection "Add to Common Dx Preference List".
4. Left click the "Accept" button.
5. To select from your Preference List, click the "Add" button in the Problem List window.
6. Your preference list will open. Select the appropriate problem by left clicking over the name. Don't forget to left click the "Accept" button.
7. When needed, left click the "Database Lookup" button to return to the system database to search for Problems not included in your Common Diagnosis Preference List.

Additional benefit: you can select from your Preference List when associating an admit diagnosis following these steps:

View more information about establishing a Common Diagnosis Preference List at www.CareTube.com. Enter the same user ID and password that you utilize for CareConnect. Select "Physician – CareConnect Inpatient" > "Physician Problem List" > "Problem List – How to Save a Common Diagnosis Preference List". You may also view this video on an iPhone or Mac.
