

LYMPHOID NEOPLASMS

Hospital Name/Address

**Presbyterian
Hospital of Dallas**
Texas Health Resources
8200 Walnut Hill Lane
Dallas, Texas 75231

Patient Name/Information

Patient name _____

 Medical Record # _____

 Date of Classification _____

Type of Specimen _____
 Tumor Size _____

Histopathologic Type _____
 Laterality: Bilateral Left Right

- Site**
- Nodal
 - Extranodal
- Multiple Nodal Chains Y..... N

- Laterality (if applicable)**
- Bilateral
 - Left
 - Right

- Histopathologic Type**
- Working Formulation
 - REAL Classification
 - T-Cell and Putative NK-Cell Neoplasms

- Ann Arbor Stage**
- Stage I:* Involvement of a single lymph node region (I), or localized involvement of a single extralymphatic organ or site in the absence of any lymph node involvement (IE) (rare in Hodgkin lymphoma).
 - Stage II:* Involvement of two or more lymph node regions on the same side of the diaphragm (II), or localized involvement of a single extralymphatic organ or site in association with regional lymph node involvement with or without involvement of other lymph node regions on the same side of the diaphragm (IIE). The number of regions involved may be indicated by a subscript, for example, II₃.
 - Stage III:* Involvement of lymph node regions on both sides of the diaphragm (III), which also may be accompanied by extralymphatic extension in association with adjacent lymph node involvement (IIIE) or by involvement of the spleen (III_s) or both (III_{e,s}).
 - Stage IV:* Diffuse or disseminated involvement of one or more extralymphatic organs, with or without associated lymph node involvement; or isolated extralymphatic organ involvement in the absence of adjacent regional lymph node involvement, but in conjunction with disease in distant site(s). Any involvement of the liver or bone marrow, or nodular involvement of the lung(s). The location of Stage IV disease is identified further by designating the specific site.

Prognostic Factors

Ann Arbor Stage
